

Graver Technologies

CONSLETM FILTRATION PRODUCTS

Consler Filtration Products provides comprehensive services for industrial filtration applications including the design, engineering, and manufacturing of:

Compressed Air/Gas Filters

Filter Skid Packages

Air Intake, Exhaust & Vacuum Filters

Coalescing Filters & Separators

HEPA & ULPA Filters and Pleat Packs

OEM Filter Cartridges and Components

Single and Multi-Cartridge Designs

Custom Designs

Consler Filtration Products designs and manufactures air, gas, and liquid filtration systems using pleated elements and ASME code vessels. You'll find our filters in a broad range of industrial applications including chemical processing, natural gas, power generation, and industrial gas production. In addition to a wide range of standard filters and vessels, Consler specializes in custom engineered solutions to meet specific application requirements.

Consler is a certified supplier to numerous OEM's of pumps, compressors, turbines, and vacuums. With over 30 years experience engineering and manufacturing filtration solutions, Consler has earned a solid reputation for high quality products, on-time delivery, and superior customer service. Consler Filtration Products is committed to total customer satisfaction and delivering exceptional value for our customers.

Filters are our only products, and all our efforts are focused on making sure our customers get the right filters for their applications. At Consler we constantly research new and innovative approaches to filtration. We continually refine our products to deliver higher flow rates, increased particulate retention, lower pressure drop, and greater cost savings.

Consler is dedicated to delivering quality products and services. Consler Filtration Products and Graver Technologies are ISO 9001 registered. Our commitment to continuous process improvement assures that as markets change, Consler will be there to meet the needs.

Consler Filtration Products is just one of the Graver Technologies brands that comprise Graver Technologies provides industry with products designed to facilitate and enhance separation, purification, and process filtration. Graver Technologies is a member of the Marmon Group of companies which has annual revenues of over \$6 billion worldwide. Consler Filtration Products offers our customers the flexibility of working with a small company and the financial strength of a large corporation.

Your Single Source for Air, Gas, & Liquid Filtration Needs

Consler engineers and manufactures a variety of elements, housings and filtration systems to meet today's demanding filtration separation and coalescing needs. Consler is an approved supplier to leading OEMs and E&C firms worldwide.

It's a legacy... a legacy we're proud of, one that we'd like to put to work for you. Call us today, whatever your filtration needs, and put 30 years of filtration experience to work in your process.

**Proven.
Reliable.
Long Lasting.**

Elements and Cartridges

- Higher particle retention means greater efficiency.
- Extended service life through a wide variety of pleated media material.
- Fewer change-outs for better operating economy.
- Cost competitive replacement filters for most any brand and model.

ASME Vessels and Housings

- ASME-code pressure vessels.
- Designed for fast, easy access & servicing.
- Single and multiple element designs.

Comprehensive Filtration Systems

- Turnkey filtration systems for gas & liquid fuels, and lube oils.
- Coalescing Filtration Systems
- Meets CENELEC and NEMA electrical requirements
